The V game is based on Los Santos and covers an absolutely massive world where you can explore and find various random meetings depending on how much you want to explore off the beaten path. You can ignore appointments that take the game in a different direction if you choose. There wasn't much discussion about cheats unfortunately. Specifically they have improved driving, shooting and melee combat. It will sound like driving will see the biggest improvement this time around. Makes sense. In a big city, a lot of cars and vehicles mean a lot of driving. Rockstar made this core game feature, which would be a real improvement over other games.
